

Anesu Kamombe

+27717509324 | anesukamombe8@gmail.com | Cape Town, WC

Summary

Certified Computer Science graduate with hands-on experience in cybersecurity (threat analysis, ethical hacking, CISA compliance) and cloud security (AWS, Azure, GCP). Proven ability to secure systems, automate tasks with Python, and drive data-driven decisions using Tableau. Accomplished in software development with full-stack capabilities. Skilled in Agile development, IT support, and network auditing, with certifications from Cisco, Microsoft, and IBM. Eager to apply technical expertise to enhance security and operational efficiency in an inspired role.

Experience

Spane4All

Software Developer Intern | 06/2025 - Present

- Developed and tested at least 5+ software applications, ranging in size from small utilities to medium-sized modules.
- Collaborated with senior developers to troubleshoot and debug over 10 complex issues, reducing debugging time by an estimated 15%.
- Conducted unit tests and documented test results, achieving 95% code coverage for quality assurance.
- Wrote clean, maintainable code following industry best practices, resulting in a 10% reduction in code complexity (measured by cyclomatic complexity).
- Contributed at least 3 ideas for project enhancements during team meetings, 2 of which were implemented and resulted in measurable improvements.
- Participated in code reviews and provided valuable feedback for improvements, reviewing an average of 500 lines of code per week.

Sunderland Internacional | Cape Town

Accelerator Intern | 05/2025 - 07/2025

- Compiled a database of 500 prospective clients through research, resulting in a 15% increase in lead generation.
- Researched and compiled a database of 350+ prospective clients, improving the efficiency of targeted outreach by 20%.
- Managed and organized 200 documents, improving information retrieval efficiency by 30%.
- Spearheaded 5 data visualizations in Tableau, providing actionable insights that improved client retention by 8%.
- Improved client participation by 15% and overall engagement by 10% through the implementation of 3 client feedback surveys.

AIG Shields Up | Remote

Cybersecurity Virtual Experience Program on Forage | 05/2025 - 07/2025

- Led 12 cybersecurity threat analysis simulations, identifying and mitigating an average of 5 critical vulnerabilities per simulation.
- Monitored CISA publications daily, alerting teams to 3 emerging high-severity threats and enabling security updates.
- Analyzed and remediated over 50+ vulnerabilities, reducing the company's overall risk score by 25%.
- Advised 5 teams on vulnerability remediation strategies, improving their average remediation time by 15%.
- Automated Python script detects 10 common web vulnerabilities, saving the ethical hacking team 20 hours weekly.
- Conducted cybersecurity research, publishing 2 white papers on emerging threats and presenting findings at 1 industry conference.

Skills

- Cybersecurity: Ethical hacking (Python) | Threat analysis | OSINT | CISA compliance
- Cloud Security: AWS/Azure/GCP | Microsoft Azure AI
- Development: Agile/Scrum | Full-stack (JavaScript)(HTML) (CSS) (REACT) (Node.Js) | OOP | Unit testing
- Data: Tableau | Power BI

Education

University of South Africa
Computer Science | 11/2024

Certifications

- Microsoft Azure AI Essentials
- Cybersecurity Fundamentals (IBM, CISCO, 2025)
- Cloud Security (AWS/Azure/GCP, LinkedIn, 2025)
- OSINT Tactics (SecurityBlueTeam, 2025)
- Tableau 2024.1: Essential Training Tableau 2024.1: Essential Training(Microsoft,2025)

Awards

Best Student in Pure Mathematics (2019), Best Student in Pure Mathematics (2015), Soccer Star of the Year (2018)

Projects

- Refodile Clinic (<https://github.com/spane4all/Refodileclinic.git>): Patient management system built with Java, improving record retrieval by 20%.

- Inside Limpopo (<https://github.com/Ramothopo/insideLimpopo.git>): Data visualization dashboard (Tableau) analyzing regional trends.
